6. Proposals	5-6
6.1 Proposal 1 – Simplification of compliance with GAR 39.59 (k) MCM	

1. Introduction

This Notice of Proposed Amendment recommends changes to GAR 39.59 to simplify compliance with GAR 39.9 (k) through the use of a fixed Approval Conditions Supplement instead of a template tailored by the Approval Validation Holder

2. Consultation Categories

This Notice of Proposed Amendment is offered to interested parties for both information only. The proposal in this NPA falls into category 1.

Category 1: Information only. This applies to those proposals that would have no material impact on interested parties, or codify policies and practices that are already in use, or are adaptations to external developments that cannot be influenced by Guernsey.

It is proposed that Option 1 organisations that are currently validated will continue using their existing supplement until their renewal. New applicants will be validated using the fixed Approval Conditions Supplement from the date of implementation of this change 1st January 2026.

3. Method of Consultation

This NPA is to be published on www.2-reg/consultations for info only.

4. Timelines

NPA Publication until 31st December

The change becomes effective on the publication date. Implementation 01/01/2026.

5. List of Proposals

Proposal no.	Title of proposal	Consultation category	Interested parties *	Proposed effectivity date
1	Simplification of compliance with GAR 39.59 Maintenance Control Manual (MCM) and the MCM supplement for GAR Part 39 (Option 1) organisations. Including its related references GAR 39.91 and GAR 39.101 in reference to the same.	1	CAMO AMO	01/01/2026

^{*} CAMO/TC: Technical Coordinator/AMO/Operator/Owner

6.1 Proposal 1 – Simplification of compliance with GAR 39.59 (k) MCM

Reason:	Simplification of compliance with GAR 39.59 (K) Maintenance Control Manual (MCM) and the MCM supplement for GAR Part 39 (Option 1) organisations. Including its related references GAR 39.91 and GAR 39.101 in reference to the same.	
Justification:	Simplification of compliance with GAR 39.59 through the use of a fixed Approval Conditions Supplement instead of a template tailored by the Approval Validation Holder.	
Safety impact:	Nil	
Regulatory verification:	rification: ICAO Doc 9760 Part III Chapter 7.2 GAR 39.59, 39.91, 39.101	

Exposition or Combined Airworthiness Exposition approved under Option 1 of 39.51(b) will satisfy the requirements for the Maintenance Control Manual in this GAR Subpart, provided a Maintenance Control Manual Supplement referencing applicable GARs acceptable to the Director is incorporated.
